

Things to add:

- Mathematics

-Precalc

[Textbook](#)

- Calc 1

[Textbook](#)

- Calc 2 (as learned)

[Textbook](#)

-Multivariable calc (when learned next)

[Textbook](#)

- more to come

Computer Science:

-[Python Textbook](#)

Content Contains:

Syntax, Features of Python.

Print

Loops

Functions

Conditions

- C language

[Ansi Textbook](#)

[C Primer Plus](#)

-Php

[W3School \(Web development\)](#)

-Html(basics)

[Syntax and structure](#)

-verilog(VHDL)

[FPGA](#)

[FPGA](#)

- Digital Logic and applications

- [Digital Logic w/verilog](#)

-[Gates](#)

- [K-Maps](#)

- [Boolean Algebra](#)

- [Book 2](#)

- Operating Systems

-[Three pieces of Operating Systems](#)

-Matlab Programming (Similar to Python)

- (remember to upload book)

Electrical engineering

[-Voltage Measurements](#)

[Applications](#)

- [Computer architecture](#)

- Microcontroller Systems

-(Manufacturer Website)

breadboards

different controllers (pinout and reading diagrams)

- Embedded Systems

- Upload book here (remember to do later)

-Material Science

[Material Science Book](#)

-Signals Systems

[Textbook](#)

- Schematic Fundamentals

[Textbook](#)

Update:

Working on site functionality

Update functionality to math features and buttons.(7/1/26)

Successfully updated buttons to work fluently in each tab on the website(7/2/26)

Todo: (7/3/26)

Adding content:

- Mathematics (Math)

-Algebra Context

-Pre Calc

- Calculus

-Calc 2 (start)

- Basic circuit Understanding (Reference)

- I probably going to put it into reference

- References to Microcontroller

- Basic Gates and binary number understanding.

-Programming (Python)

-Syntax

-Features in python

- Building a first project?

- Programming(C language)

-Syntax

- Features
- How to's
- Implementation of C
- Reference
- Psuedo Algorithm
- Karungh Maps (K-MAPS pinout)

Introduction: (fully updated)

-using "believe" twice in the third paragraph sounds awkward.

-need a period at end of third paragraph

-maybe use "proponent" instead of "big fan"? or something in that vein

-when you add more content to the site, don't put the about/education info on the front page. i

assume the point of the website is not for people to read about who you are.

-you should probably also remove your high school, no one cares where anyone went to high school

Resource:

Rememmbber for all information to credit sources (important on an academia reference page)
