

June 2026

Updated Resume – Done

Finish reviewing calc 1 – Done

Finish reading driver manual –Done

Practice Test for driving manual - Done

Start Reading Electronic Repair guide/manual -IP (In Progress)

Drivers Permit –Done

**If possible (does not have hard deadline ~ try to digitize all physical books into pdfs)

Digital Logic - Get started on this weekend 6/27 weekend

Calc 2 - IP (In Progress)

July 2026

Driving Lessons

Start on Physics textbook

Continued goals:

Calc 2

Digital Logic

Electronic Repair manual/guide

Github website

August 2026:

TBD

Book Reading List:

(Currently Reading)

Electronic Repair Cookbook (Mark Rumreich)

Calc 2 (Openstax Free for anyone)

Books to get started on (in order)

Engineering Books:

Digital Logic W/ Verilog Design (Mcgraw hill) ~ start 6/27

Physics for Scientist (PDF on G-drive) ~ start 6/27

C programming language (ANSI Brain W.KERNIGHAN) ~ start 6/27

Matlab and Simulink Crash course for engineers ~ start by next week (pref by monday)

C Primer Plus ~ Start by next week (pref by monday)

Arm Cortex M3 Microcontroller (pref by monday)

Modern Computer Architecture and Organization

Practical Debugging Arm systems

Scientist and engineers guide to Digital Signal Processing

How to diagnose and fix everything electronic mcgraw hill

Troubleshooting and repairing consumer electronics without a schematic

C interface and implementations

Beginners guide to read schematics (Mcgraw hill)

ECE 35

ECE 35 ALT

Onshape fundamentals

Operating System fundamental

Fundamental of High Voltage

Powershell for beginners

Quantum Computing

Python

SQL

Javascript

SQL

C++

C#

Risc-V architecture

Semiconductor Supply Chain

Modern Repair gadget bible

Windows command line

Signals and systems

EE handbook

EE fundamental & exercises

Advanced engineering mathematics for engineers

Principal of electronic and electrical material

Art of Electronics

Semiconductor theory and application

The arm sequence books - From official arm website

FPGA programming for beginners

References:

Algebra and Trig (Openstax Both digital and Physical

Engineering skill for success Alexander watson Mcgrawhill

Engineering Fundamentals Saeed Moaveni

They Say, I say - Academic Writing Reference

How to Solder

Linux reference

Intro to electrical circuit theory

Harris D. M., Harris S. L. - Digital Design and Computer Architecture, 2nd Edition - 2012.pdf

Books to read for good information:

Founders at work

90 miles to havana

Lord of the flies

7 habits of highly effective people
